JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

The Modern Study of Literature

By **RICHARD GREEN MOULTON**

*Head of the Department of General Literature
in the University of Chicago*

THIS volume is attracting wide attention from students of literature. It is written by a life-long student and interpreter of literature, and is designed as an introduction to literary theory and interpretation. The general purpose of the work is to present, alike to the teacher and to the cultured reader, the intrinsic study of literature as inspired by modern ideas and inductive science.

It treats, successively, Literary Morphology and Literary Evolution; Literary Criticism; the traditional confusion and modern reconstruction of criticism; and the conception of literature as at once a Mode of Philosophy and a Mode of Art. While abstract discussion is not avoided where it is necessary, the general plan of the work is to elucidate the philosophy of literature in application to familiar literary masterpieces.
